1 General information

Using the documentation

Thank you for buying our machine! Reading the documentation will help you make the most of your machine.

Symbols and conventions used in the documentation

The following symbols and conventions are used throughout the documentation.

⚠️ WARNING

WARNING indicates a potentially hazardous situation which, if not avoided, could result in death or serious injuries.

⚠️ Important

Important indicates a potentially hazardous situation which, if not avoided, may result in damage to property or loss of product functionality.

- Prohibition icons indicate actions that must not be performed.
- Electrical Hazard icons alert you to a possible electrical shock.
- Fire Hazard icons alert you to the possibility of fire.
- Hot Surface icons warn you not to touch machine parts that are hot.
- Notes tell you how you should respond to a situation that may arise or give tips about how the current operation works with other features.
To view Documentation

From the Start menu, select TYPE 1195L from the Programs Group and then select User’s Guide.

—OR—

1. Turn on your PC. Insert the CD-ROM for Type 1195L into your CD-ROM drive.
2. If the model name screen appears, click your model name.
3. If the language screen appears, click your language.

The CD-ROM main menu will appear.

Note

If this window does not appear, use Windows® Explorer to run the setup.exe program from the root directory of the CD-ROM.

4. Click Documentation.
5. Click the documentation you want to read. (See User’s Guides and where do I find them? page i.)
Control panel overview

1 One Touch keys
These 11 keys give you instant access to 22 previously stored numbers.

Shift
Lets you access One Touch numbers 12 to 22 when held down.

2 LCD
Displays messages to help you set up and use your machine.

3 Mode keys:

Fax
Puts the machine in FAX mode.

Copy
Puts the machine in COPY mode.

4 Dial pad
Use these keys to dial telephone and fax numbers and as a keyboard for entering information into the machine.

5 Stop/Exit
Stops an operation or exits from a menu.

6 Start
Lets you start sending faxes or making copies.

7 Menu keys:

Clear
Deletes entered data or lets you cancel the current setting.

Menu
Lets you access the Menu to program your settings in the machine.

OK
Lets you store your settings and confirm LCD messages on the machine.

Volume keys:

Press to scroll backwards or forwards through menu selections. Press to change the volume when in fax or standby mode.

Address Book
Lets you access speed dial numbers directly.
8 COPY key:

Options
You can quickly and easily choose temporary settings for copying.

9 FAX keys:

Tel/R
When connected to a PBX, you can use this key to gain access to an outside line, to recall an operator, or to transfer a call to another extension.
This key is used to have a telephone conversation after picking up the external handset during the F/T fast double-ring.

Redial/Pause
Redials the last number called. It also inserts a pause when programming quick dial numbers or when dialling a number manually.

Resolution
Sets the resolution when sending a fax.
Volume settings

Ring volume

You can choose a range of ring volume levels, from High to Off.

While in FAX mode press \[ or \[ to adjust the current volume level. The LCD will show the current setting, and each key press will change the volume to the next level. The machine will keep the new setting until you change it.

You can also change the ring volume through the menu:

1 Press \[, 1, 3, 1.
2 Press \[ or \[ to choose Off, Low, Med or High.
   Press OK.
3 Press \[.

Beeper volume

When the beeper is on, the machine will beep when you press a key, make a mistake, or after you send or receive a fax. You can choose a range of volume levels, from High to Off.

1 Press \[, 1, 3, 2.
2 Press \[ or \[ to choose Off, Low, Med or High.
   Press OK.
3 Press \[.

Speaker volume

You can choose a range of speaker volume levels, from High to Off.

1 Press \[, 1, 3, 3.
2 Press \[ or \[ to choose Off, Low, Med or High.
   Press OK.
3 Press \[.
2 Loading paper

Loading paper and print media

The machine can feed paper from the standard paper tray or manual feed slot.

Loading paper in the standard paper tray

You can load up to 250 sheets. Paper can be loaded up to the maximum paper mark (▼▼) on the right-hand side of the paper tray. (For the recommended paper to use, see Paper capacity of the paper trays page 14.)

Printing on plain paper, thin paper or recycled paper from the standard paper tray

1. Pull the paper tray completely out of the machine.

2. While pressing the paper-guide release lever, slide the paper guides to fit the paper size you are loading in the tray. Make sure that the guides are firmly in the slots.
Fan the stack of paper well to avoid paper jams and misfeeds.

Put paper in the tray and make sure:
- The paper is below the maximum paper mark (▼ ▼) (1). Overfilling the paper tray will cause paper jams.
- The side to be printed on must be face down.
- The paper guides touch the sides of the paper so it will feed correctly.

Put the paper tray firmly back in the machine. Make sure that it is completely inserted into the machine.

Raise the ADF document output support flap (1) and unfold the support flap (2) to prevent paper from sliding off the face-down output tray.
Chapter 2

Loading paper in the manual feed slot

You can load envelopes and special print media one at a time into this slot. Use the manual feed slot to print or copy on labels, envelopes or thicker paper.

Note
The machine automatically turns on the Manual Feed mode when you put paper in the manual feed slot.

Printing on plain paper, thin paper or recycled paper from the manual feed slot

1. Raise the ADF document output support flap (1) and unfold the support flap (2) to prevent paper from sliding off the face-down output tray, or remove each page as soon as it comes out of the machine.

2. Open the manual feed slot cover.

3. Using both hands, slide the manual feed slot paper guides to the width of the paper that you are going to use.
Using both hands, put one sheet of paper in the manual feed slot until the front edge of the paper touches the paper feed roller. When you feel the machine pull in the paper, let go.

Printing on thick paper, bond paper, labels and envelopes

When the back output tray is pulled down, the machine has a straight paper path from the manual feed slot through to the back of the machine. Use this paper feed and output method when you want to print on thick paper, labels or envelopes.

Note

Remove each printed sheet or envelope immediately to prevent a paper jam.
Note

<For envelopes only>
Pull down the two green levers, one on the left-hand side and one on the right-hand side, as shown in the following illustration.

3 Using both hands, slide the manual feed slot paper guides to the width of the paper that you are going to use.

Open the manual feed slot cover.

4 Using both hands, put one sheet of paper or one envelope in the manual feed slot until the front edge of the paper or envelope touches the paper feed roller. When you feel the machine pull in the paper, let go.
Note

- Put the paper into the manual feed slot with the side to be printed face up.

- Make sure that the print media is straight and in the correct position on the manual feed slot. If it is not, the paper may not be fed correctly, resulting in a skewed printout or a paper jam.

- Do not put more than one sheet of paper in the manual feed slot at any one time, as it may cause a jam.

- If you put any print media in the manual feed slot before the machine is in Ready mode, the print media may be ejected without being printed on.
Unscannable and unprintable areas

The figures below show the maximum unscannable and unprintable areas. The unscannable and unprintable areas may vary depending on the paper size you are using.

<table>
<thead>
<tr>
<th>Usage</th>
<th>Document Size</th>
<th>Top (1)</th>

</table>
Paper settings

Paper Type

Set up the machine for the type of paper you are using. This will give you the best print quality.

1. Press \( \text{Setting}, 1, 2, 1. \)
2. Press \( \text{or } \text{Label} \) to choose Thin, Plain, Thick, Thicker, Recycled Paper or Label. Press OK.
3. Press \( \text{Home} \).

Paper Size

You can use several different sizes of paper for printing copies: A4, Letter, Executive, A5, A5 L, A6, B5, or B6 and for printing faxes: A4 or Letter.

When you change the size of paper in the tray, you will also need to change the setting for paper size at the same time so your machine can fit the document or an incoming fax on the page.

1. Press \( \text{Setting}, 1, 2, 2. \)
2. Press \( \text{or } \) to choose A4, Letter, Executive, A5, A5 L, A6, B5, or B6. Press OK.
3. Press \( \text{Home} \).

Acceptable paper and other print media

Print quality may vary according to the type of paper you are using.

You can use the following types of print media: thin paper, plain paper, thick paper, bond paper, recycled paper, labels or envelopes.

For best results, follow the instructions below:

- DO NOT put different types of paper in the paper tray at the same time because it may cause paper jams or misfeeds.
- Avoid touching the printed surface of the paper immediately after printing.
- Before you buy a lot of paper, test a small quantity to make sure the paper is suitable.

<td>Below 23 wt%</td>
</tr>
<tr>
<td>Brightness</td>
<td>Higher than 80%</td>
</tr>
<tr>
<td>Opacity</td>
<td>Higher than 85%</td>
</tr>
</tbody>
</table>

- Only use paper made for plain paper copying.
- Only use paper that is 75 to 90 g/m².
- Only use long grain paper with a neutral Ph value, and a moisture content of approx. 5%.
- This machine can use recycled paper that meets DIN 19309 specifications.
Handling and using special paper

The machine is designed to work well with most types of xerographic and bond paper. However, some paper variables may have an effect on print quality or handling reliability. Always test samples of paper before purchasing to ensure desirable performance. Store paper in its original packaging and keep it sealed. Keep the paper flat and away from moisture, direct sunlight and heat.

Some important guidelines when selecting paper are:

- DO NOT use inkjet paper because it may cause a paper jam or damage your machine.
- Preprinted paper must use ink that can withstand the temperature of the machine’s fusing process of 392 degrees Fahrenheit (200 degrees centigrade).
- If you use bond paper, paper that has a rough surface or paper that is wrinkled or creased, the paper may exhibit degraded performance.

Types of paper to avoid

⚠️ Important

Some types of paper may not perform well or may cause damage to your machine.

DO NOT use paper:

- that is highly textured
- that is extremely smooth or shiny
- that is curled or warped
- that is coated or has a chemical finish
- that is damaged, creased or folded
- that exceeds the recommended weight specification in this guide
- with tabs and staples
- with letterheads using low temperature dyes or thermography
- that is multipart or carbonless
- that is designed for inkjet printing

If you use any of the types of paper listed above, they may damage your machine. This damage may not be covered under any our warranty or service agreement.
Envelopes

Most envelopes designed for laser printers will be suitable for your machine. However, some envelopes may have feed and print-quality problems because of the way they have been made. A suitable envelope should have edges with straight, well-creased folds and the leading edge should not be thicker than two sheets of paper. The envelope should lie flat and not be of baggy or flimsy construction. You should buy quality envelopes from a supplier who understands that you will be using the envelopes in a laser machine.

Envelopes can be fed from the manual feed slot one at a time. We recommend that you print a test envelope to make sure the print results are what you want before you print or purchase a large quantity of envelopes.

Types of envelopes to avoid

**Important**

DO NOT use envelopes:

- that are damaged, curled, wrinkled or an unusual shape
- that are extremely shiny or textured
- with clasps, staples, snaps or tie strings
- with self-adhesive closures
- that are of a baggy construction
- that are not sharply creased
- that are embossed (have raised writing on them)
- that were previously printed by a laser machine
- that are pre-printed on the inside
- that cannot be arranged neatly when stacked
- that are made of paper that weighs more than the paper weight specifications for the machine
- with edges that are not straight or consistently square
- with windows, holes, cut-outs or perforations
- with glue on the surface as shown in the figure below
- with double flaps as shown in the figure below
- with sealing flaps that are not folded down when purchased
- with sealing flaps as shown in the figure below
- with each side folded as shown in the figure below
If you use any of the types of envelopes listed in this guide, they may damage your machine. This damage may not be covered under any our warranty or service agreement.

Labels
The machine will print on most types of labels designed for use with a laser machine. Labels should have an adhesive that is acrylic-based since this material is more stable at the high temperatures in the fuser unit. Adhesives should not come in contact with any part of the machine, because the label stock may stick to the drum unit or rollers and cause jams and print quality problems. No adhesive should be exposed between the labels. Labels should be arranged so that they cover the entire length and width of the sheet. Using labels with spaces may result in labels peeling off and causing serious jams or print problems.

All labels used in this machine must be able to withstand a temperature of 392 degrees Fahrenheit (200 degrees centigrade) for a period of 0.1 seconds.

Do not feed a label sheet through the machine more than one time.

Types of labels to avoid
Do not use labels that are damaged, curled, wrinkled or an unusual shape.

⚠️ Important
• DO NOT feed part used label sheets. The exposed carrier sheet will damage your machine.
• Label sheets should not exceed the paper weight specifications described in this User’s Guide. Labels exceeding this specification may not feed or print correctly and may cause damage to your machine.
• DO NOT reuse or insert labels that have previously been used or are missing any labels on the sheet.
How to load documents

You can send a fax and make copies from the ADF (Automatic Document Feeder).

Using the automatic document feeder (ADF)

The ADF can hold up to 20 pages and feeds each sheet individually. Use standard 80 g/m² paper and always fan the pages before putting them in the ADF.

The ADF can hold up to 30 pages, if you stagger the pages and meet the following conditions:
- Temperature: 20°C - 30°C
- Humidity: 50% - 70%
- Paper: 80 g/m²

Document Sizes Supported

<table>
<thead>
<tr>
<th>Length</th>
<th>147.3 to 355.6 mm</th>
</tr>
</thead>
<tbody>
<tr>
<td>Width</td>
<td>147.3 to 215.9 mm</td>
</tr>
<tr>
<td>Weight</td>
<td>64 to 90 g/m²</td>
</tr>
</tbody>
</table>

Important

- DO NOT use paper that is curled, wrinkled, folded, ripped, stapled, paper-clipped, glued or taped.
- DO NOT use cardboard, newspaper or fabric.
- To avoid damaging your machine while using the ADF, DO NOT pull on the document while it is feeding.

How to load documents

1. Unfold the ADF document support (1) and the ADF document output support flap (2).

2. Fan the pages well.

3. Stagger the pages of your document face down top edge first, in the ADF until the LCD display message changes and you feel it touch the feed rollers.

Note

Make sure documents with correction fluid or written with ink are completely dry.
4 Adjust the paper guides (1) to fit the width of your document.

Important
To avoid damaging your machine while using the ADF, DO NOT pull on the document while it is feeding.
How to send a fax

The following steps show how to send a fax.

1. When you want to send a fax, or change fax send or receive settings, press the (FAX) key to illuminate it in green.

2. Place the document face down in the ADF. (See Using the automatic document feeder (ADF) page 18.)

3. Set the fax resolution or contrast if you want to change them.

   For more advanced fax sending operations and settings, see Advanced User’s Guide: Sending a fax.
   - Broadcast
   - Contrast
   - Fax Resolution
   - Delayed Fax
   - Batch TX
   - Real Time TX
   - Polled TX
   - Coverpg Setup
   - Coverpage Note
   - Overseas Mode

4. Enter the fax number using the dial pad, a One Touch key or press and enter the three-digit Speed Dial number.

5. Press .

   The machine starts scanning and sending the document.

Note

To cancel, press .

Cancelling a fax in progress

Press to cancel the fax. If you press while the machine is dialling or sending, the LCD will ask you to confirm.

Dialing #XXX
1.Clear 2.Exit

Sending #XXX PXX
1.Clear 2.Exit

Press 1 to cancel the fax.
Transmission verification report

You can use the Transmission Verification Report as proof that you sent a fax. This report lists the receiving party's name or fax number, the time and date of transmission, duration of transmission, number of pages sent, and whether or not the transmission was successful.

There are several settings available for the Transmission Verification Report:

- **On**: Prints a report after every fax you send.
- **On+Image**: Prints a report after every fax you send. A portion of the fax’s first page appears on the report.
- **Off**: Prints a report if your fax is unsuccessful due to a transmission error. Off is the default setting.
- **Off+Image**: Prints a report if your fax is unsuccessful due to a transmission error. A portion of the fax’s first page appears on the report.

1. Press \( \text{①} \) , 2, 4, 1.

2. Press \( \text{②} \) or \( \text{④} \) to choose **On**, **On+Image**, **Off** or **Off+Image**. Press **OK**.

3. Press \( \text{⑤} \).

**Note**

- If you choose **On+Image** or **Off+Image**, the image will only appear on the Transmission Verification Report if Real Time Transmission is set to **Off**. (See Advanced User’s Guide: *Real Time Transmission*.)

- If your transmission is successful, **OK** will appear next to RESULT on the Transmission Verification Report. If the transmission is not successful, **ERROR** will appear next to RESULT.
Receive modes

Note
You can use two sizes of paper for printing faxes: A4 and Letter.

You must choose a receive mode depending on the external devices and telephone services you have on your line.

Choosing the receive mode

By default, your machine will automatically receive any faxes that are sent to it. The diagrams below will help you choose the correct mode. (For more detailed information about the receive modes, see Using receive modes on page 23.)

To set the receive mode follow the instructions below:

1. Press \( \text{Fax} \), 0, 1.
2. Press \( \text{A} \) or \( \text{V} \) to choose the receive mode. Press \( \text{OK} \).
3. Press \( \text{Exit} \).

The LCD will display the current receive mode.
Using receive modes

Some receive modes answer automatically (Fax Only and Fax/Tel). You may want to change the Ring Delay before using these modes. (See Ring Delay page 24.)

**Fax Only**

Fax Only mode will automatically answer every call as a fax.

**Fax/Tel**

Fax/Tel mode helps you automatically manage incoming calls, by recognising whether they are fax or voice calls and dealing with them in the following ways:

- Faxes will be automatically received.
- Voice calls will start the F/T ring to tell you to pick up the line. The F/T ring is a fast double ring made by your machine.

(Also see Ring Delay page 24 and F/T Ring Time (Fax/Tel mode only) page 24.)

**Manual**

Manual mode turns off all automatic answering functions unless you are using the BT Call Sign feature.

1 BT Call Sign is for U.K. only.

To receive a fax in Manual mode lift the handset of the external telephone.

When you hear fax tones (short repeating beeps), press .

You can also use the Fax Detect feature to receive faxes by lifting a handset on the same line as the machine.

(Also see Fax Detect page 25.)

External TAD

External TAD mode lets an external answering device manage your incoming calls. Incoming calls will be dealt with in the following ways:

- Faxes will be automatically received.
- Voice callers can record a message on the external TAD.

(For more information, see Connecting an external TAD page 28.)
Receive Mode settings

Ring Delay

The Ring Delay setting sets the number of times the machine rings before it answers in Fax Only and Fax/Tel modes.

If you have external or extension telephones on the same line as the machine, choose the maximum number of rings. (See Operation from external or extension telephones page 31 and Fax Detect page 25.)

1. Make sure you are in FAX mode.

2. Press , 2, 1, 1.

3. Press ▲ or ▼ to choose how many times the machine will ring before it answers.

Press OK.

4. Press .

F/T Ring Time

(Fax/Tel mode only)

When somebody calls your machine, you and your caller will hear the normal telephone ring sound. The number of rings is set by the Ring Delay setting.

If the call is a fax, then your machine will receive it; however, if it is a voice call the machine will sound the F/T ring (a fast double-ring) for the time you have set in the F/T Ring Time setting. If you hear the F/T ring it means that you have a voice caller on the line.

Because the F/T ring is made by the machine, extension and external telephones will not ring; however, you can still answer the call on any telephone. (For more information, see Using Remote Codes page 33.)

1. Make sure you are in FAX mode.

2. Press , 2, 1, 2.

3. Press ▲ or ▼ to choose how long the machine will ring to alert you that you have a voice call (20, 30, 40 or 70 seconds).

Press OK.

4. Press .
**Fax Detect**

**If Fax Detect is On:**

The machine can receive a fax automatically, even if you answer the call. When you see *Receiving* on the LCD or hear a click on the phone line through the handset you are using, just replace the handset. Your machine will do the rest.

**If Fax Detect is Off:**

If you are at the machine and answer a fax call by lifting the handset of an external telephone, press \( \text{Fax} \).

If you answered at an extension or external telephone press \( \times 51 \). (See *Operation from external or extension telephones* \( \gg \) page 31.)

**Note**

- If this feature is set to \( \text{On} \), but your machine does not connect a fax call when you lift an extension telephone handset, press the fax receive code \( \times 51 \).
- If you send faxes from a computer on the same telephone line and the machine intercepts them, set Fax Detect to \( \text{Off} \).

1. Make sure you are in FAX mode \( \text{Fax} \).
2. Press \( \text{Fax} \), 2, 1, 3.
3. Press \( \text{Fax} \) or \( \text{On} \) to choose \( \text{On} \) or \( \text{Off} \). Press \( \text{OK} \).
4. Press \( \text{Fax} \).
Telephone line services

Setting the telephone line type

If you are connecting the machine to a line that features a PBX or ISDN to send and receive faxes, it is necessary to change the Telephone Line Type accordingly by completing the following steps. If you are using a line that features a PBX, you can set your machine so that it always accesses the outside line (using the prefix you entered), or accesses the outside line when ☩ is pressed.

1. Press ☩, 0, 6.
2. Press ☩ or ☩ to choose PBX, ISDN (or Normal). Press OK.
3. Do one of the following:
   - If you chose ISDN or Normal, go to step 7.
   - If you chose PBX, press OK and go to step 4.
4. Do one of the following:
   - If you want to change the current prefix number, press 1 and go to step 5.
   - If you do not want to change the current prefix number, press 1 and then OK. Go to step 6.
5. Enter the prefix number (up to 5 digits) on the dial pad. Press OK.

Note

- You can use the numbers 0 to 9, #, *, and !.
  (Press ☩ to display “!”.)
- You cannot use ! with any other numbers or characters.
- If you choose On, pressing ☩ (the screen displays “!”) will let you access an outside line.
- If you choose Always, you can access an outside line without pressing ☩.

6. Press ☩ or ☩ to choose On or Always. Press OK.
7. Press ☩.

PBX and TRANSFER

The machine is initially set to Normal, which lets the machine connect to a standard PSTN (Public Switched Telephone Network) line. However, many offices use a central telephone system or Private Branch Exchange (PBX). Your machine can be connected to most types of PBX. The machine’s recall feature supports timed break recall only (TBR). TBR will work with most PBX systems allowing you to gain access to an outside line, or transfer calls to another extension. The feature works when ☩ is pressed.
Telephone Service for Some Countries

Distinctive Ringing (For Singapore and Hong Kong)

This machine feature lets you use the Distinctive Ringing subscriber service offered by some telephone companies, which allows you to have several telephone numbers on one telephone line. Each telephone number has its own Distinctive Ringing pattern, so you will know which telephone number is ringing. This is one way you can have a separate telephone number for your machine.

Your machine has a Distinctive Ringing function, allowing you to dedicate one telephone number just for receiving faxes. You will need to set Distinctive Ringing to On.

Note

You can switch it off temporarily, then turn it back on. When you get a new fax number, make sure you reset this function.

- The machine will answer only calls to the Distinctive Ringing number.

Set the Distinctive Ring to On

After you have set the Distinctive Ring feature to ON, the receive mode is set to Manual automatically. Unless you have a TAD or Voice Mail set up on the Distinctive Ring number, Manual mode means you must answer all the calls yourself. You can not change the receive mode to another mode while the Distinctive Ring is set to on.

1. Press \( \text{\#}, \text{2}, \text{0}, \text{2} \).
2. Press \( \text{\#} \) or \( \text{\#} \) to choose On.
3. Press OK.
4. Press \( \text{\#} \). Distinctive Ring is now set to on.

Turning off Distinctive Ring

1. Press \( \text{\#}, \text{2}, \text{0}, \text{2} \).
2. Press \( \text{\#} \) or \( \text{\#} \) to choose Off.
3. Press OK.
4. Press \( \text{\#} \).

Note

If you turn off Distinctive Ring, the machine will stay in Manual receive mode. You will need to set the Receive mode again. (Choosing the receive mode \( \text{\#} \) page 22.)
Connecting an external TAD

You can connect an external Telephone Answering Device (TAD) to the same line as your machine. When the TAD answers a call, your machine will "listen" for the CNG (fax calling) tones sent by a sending fax machine. If it hears them it will take over the call and receive the fax. If it does not hear them, it will let your TAD take a voice message and the display will show Telephone (for EU) or Ext. Tel in Use (for Asia).

The external TAD must answer within four rings (we recommend you set it to two rings). This is because your machine cannot hear the CNG tones until the external TAD has picked up the call. The sending machine will only send CNG tones for eight to ten more seconds. We do not recommend using the toll saver feature on your external TAD if it needs more than four rings to activate it.

Note

If you have problems receiving faxes, reduce the ring delay setting on your external TAD.

Connections

The external TAD must be connected as shown in the illustration below.

Type A

For the countries such as USA, Canada, Spain, Netherlands, Portugal, Poland, Hungary, Czech, Norway, Asia, Oceania and etc.

Before you connect an external TAD, remove the protective cap (2) from the EXT. jack on the machine.

Type B

For the countries such as UK, France, Italy, Belgium, Sweden, Denmark and Finland.
Type C
For Germany

Type D
For Switzerland

Recording an outgoing message (OGM)

1. Record 5 seconds of silence at the beginning of your message. This allows your machine time to listen for fax tones.
2. Limit your speaking to 20 seconds.
3. End your 20-second message by giving your Remove Activation Code for people sending manual faxes. For example: “After the beep, leave a message or press *51 and \( \) to send a fax.”

Note
- You need to turn the Remote Codes setting to on to use the Fax Activation Code *51. (See Using Remote Codes page 33.)
- We recommend beginning your OGM with an initial 5 second silence because the machine may not hear the fax tones over a voice. You may try leaving out this pause, but if your machine has trouble receiving, then you should re-record the OGM to include it.

Multi-line connections (PBX)

We suggest you ask the company who installed your PBX to connect your machine. If you have a multi line system we suggest you ask the installer to connect the unit to the last line on the system. This prevents the machine being activated each time the system receives telephone calls. If all incoming calls will be answered by a switchboard operator we recommend that you set the Receive Mode to Manual.

We cannot guarantee that your machine will operate correctly under all circumstances when connected to a PBX. Any difficulties with sending or receiving faxes should be reported first to the company who handles your PBX.
External and extension telephones

Note
You need to turn the Remote Codes setting to on to use the Remote Activation Code #51 and Remote Deactivation Code #51. (See Using Remote Codes page 33.)

Connecting an external or extension telephone

You can connect a separate telephone directly to your machine as shown in the diagram below.

Type A
For the countries such as USA, Canada, Spain, Netherlands, Portugal, Poland, Hungary, Czech, Norway, Asia, Oceania and etc.

Before you connect an external telephone, remove the protective cap (3) from the EXT. jack on the machine.

Type B
For the countries such as UK, France, Italy, Belgium, Sweden, Denmark and Finland.

Type C
For Germany

Type D
For Switzerland

When you are using an external telephone, the LCD shows Telephone (for EU) or Ext. Tel in Use (for Asia).
Operation from external or extension telephones

If you answer a fax call on an extension telephone, or an external telephone that is correctly connected to the machine through the T-piece connection, you can make your machine take the call by using the Remote Activation code. When you press the Remote Activation code *51 the machine starts to receive the fax.

If you answer a call and no one is on the line:

You should assume that you’re receiving a manual fax.

Press *51 and wait for the chirp or until the LCD shows Receiving, and then hang up.

Note

You can also use the Fax Detect feature to make your machine automatically take the call. (See Fax Detect >>> page 25.)

For Fax/Tel mode only

When the machine is in Fax/Tel mode, it will use the F/T Ring Time (fast/double-ringing) to alert you to pick up a voice call.

Lift the external telephone’s handset, and then press ✉️ to answer.

If you are at an extension telephone, you will need to lift the handset of the extension telephone during the F/T Ring Time and then press #51 on the extension telephone between the fast/double rings to turn the F/T ring off. If no one is on the line, or if someone wants to send you a fax, send the call back to the machine by pressing *51.

Using extension telephones (U.K. only)

Your premises may already be wired with parallel extension telephones (those connected to sockets in other rooms in the building), or perhaps you intend to add extension telephones to your line. While the simplest arrangement is a parallel connection, there are some reasons why this arrangement may cause problems.

The most common problem is someone picking up an extension telephone while the machine is trying to send a fax.

Such problems can easily be eliminated, if you arrange modification of your extension wiring circuit, such that extension devices are connected “downstream” of your machine, in a master/slave configuration (see figure 2). In such a configuration, this machine can always detect whether a telephone is in use, so it will not attempt to seize the line during that time. This is known as “telephone off-hook detection”.

The inadvisable configuration is shown in figure 1, and the recommended master/slave configuration is shown in figure 2.

This new connection configuration can be arranged by contacting BT, Kingston upon Hull Telecommunications, your PBX maintainer or a qualified telephone installation company as appropriate. Simply explained, the extension telephone circuit should be terminated on a normal modular plug (BT 431A style), which in turn should be inserted into the modular socket of the white “T”-shaped connector provided as part of the line cord assembly.
These phones are now connected as external devices as shown on page 30, because they are connected to the fax machine via the T-connector.

Using a cordless external handset

If your cordless telephone is connected to the machine through the T-piece connection (see Connecting an external or extension telephone page 30) and you typically carry the cordless handset elsewhere, it is easier to answer calls during the Ring Delay. If you let the machine answer first, lift the cordless handset and then go to the machine so you can press \( \text{Transfer} \) to transfer the call to the cordless handset.
Using Remote Codes

Remote Activation Code
If you answer a fax call on an extension telephone, you can tell your machine to receive it by pressing the Remote Activation Code *51. Wait for the chirping sounds then replace the handset. (See Fax Detect page 25.)

If you answer a fax call on the external telephone, you can make the machine receive the fax by pressing #51.

Remote Deactivation Code
If you receive a voice call and the machine is in F/T mode, it will start to sound the F/T ring (double-ring) after the initial ring delay. If you pick up the call on an extension telephone you can turn the F/T ring off by pressing #51 (make sure you press this between the rings).

If the machine answers a voice call and fast/double-rings for you to take over; you can take the call at the external telephone by pressing #.

Turning on the Remote Codes
You need to turn the Remote Codes setting to on to use the Remote Activation Code and Remote Deactivation Code.

1. Make sure you are in FAX mode.

2. Press 2, 1, 4.

3. Press ▲ or ▼ to choose On. Press OK.

4. If you do not want to change the Remote Activation Code, press OK.

5. If you do not want to change the Remote Deactivation Code, press OK.

6. Press ok.

Changing the Remote Codes
The preset Remote Activation Code is *51. The preset Remote Deactivation Code is #51. If you are always disconnected when accessing your External TAD, try changing the three-digit remote codes, for example ### and 555.

1. Make sure you are in FAX mode.

2. Press 2, 1, 4.

3. Press ▲ or ▼ to choose On or Off. Press OK.

4. If you chose On in step 3, enter the new Remote Activation Code. Press OK.

5. Enter the new Remote Deactivation Code. Press OK.

6. Press ok.
How to dial

You can dial in any of the following ways.

**Manual dialling**

Use the dial pad to enter all the digits of the telephone or fax number.

**One Touch dialling**

Press the One Touch key that stores the number you want to call. (See Storing One Touch Dial numbers page 35.)

To dial One Touch numbers 12 to 22, hold down \( \text{Shift} \) and then press the One Touch key.

**Speed Dialling**

Press \( \text{#} / \text{#} \) and enter the three digit Speed Dial number. (See Storing Speed Dial numbers page 36.)

---

**Note**

If the LCD shows Register Now? when you enter a One Touch or a Speed Dial number, it means that a number is not stored there.
**Search**

You can search alphabetically for names you have stored in the One Touch and Speed Dial locations. (See *Storing One Touch Dial numbers* page 35 and *Storing Speed Dial numbers* page 36.)

1. Press \[\text{a}_{\text{Home}}/\text{a}_{\text{Menu}}\] twice.
2. Press the dial pad key for the first few letters of the name. (See *Entering text* page 102.) Press \[\text{OK}\].
3. Press \[\text{a}\] or \[\text{v}\] to scroll until you find the name you are looking for. Press \[\text{OK}\].
4. Press \[\text{?}\].

**Note**

- If you do not enter a letter and press \[\text{OK}\] in step 2, all registered names will appear. Press \[\text{a}\] or \[\text{v}\] to scroll until you find the name you are looking for.
- If the LCD shows *No Contact Found* when you enter the first few letters of the name, it means that a name for the letter is not stored.

**Fax redial**

If you are sending a fax automatically and the line is busy, the machine will automatically redial up to three times at five minute intervals.

\[\text{a}_{\text{Home}}/\text{a}_{\text{Menu}}\] only works if you dialed from the control panel.

---

**Storing numbers**

You can set up your machine to do the following types of easy dialling: One Touch, Speed Dial and Groups for Broadcasting faxes. When you dial a quick dial number, the LCD shows the name, if you stored it, or the number.

If you lose electrical power, the quick dial numbers stored in the memory will not be lost.

**Storing a pause**

Press \[\text{a}_{\text{Home}}/\text{a}_{\text{Menu}}\] to insert a 2.8-second pause between numbers. You can press \[\text{a}_{\text{Home}}/\text{a}_{\text{Menu}}\] as many times as needed to increase the length of the pause.

**Storing One Touch Dial numbers**

Your machine has 11 One Touch keys where you can store 22 fax or telephone numbers for automatic dialling. To access numbers 12 to 22, hold down \[\text{Shift}\] as you press the One Touch key.

1. Press the One Touch key where you want to store the number. If a number is not stored there, the LCD shows *Register Now?* Press \[1\] to choose \[\text{Yes}\].
2. Enter the telephone or fax number (up to 20 characters). Press \[\text{OK}\].
3 Do one of the following:
   - Enter the name using the dial pad (up to 15 characters). See Entering text page 102.
     Press OK.
   - Press OK to store the number without a name.

4 To store another One Touch number, go to 1.

Storing Speed Dial numbers

You can store your frequently used numbers as Speed Dial numbers, so that when you dial you will only have to press a few keys ( , the three-digit Speed Dial number and ). The machine can store 200 Speed Dial numbers (001 - 200).

1 Press and enter a three-digit Speed Dial location number (001-200). If a number is not stored there, the LCD shows Register Now? Press 1 to choose Yes.

2 Enter the telephone or fax number (up to 20 characters). Press OK.

3 Do one of the following:
   - Enter the name using the dial pad (up to 15 characters). See Entering text page 102.
     Press OK.
   - Press OK to store the number without a name.

4 To store another Speed Dial number, go to 1.

Changing One Touch and Speed Dial numbers

If you try to change a One Touch or Speed Dial number, the LCD will show the name or number already stored there. If the One Touch or Speed Dial number you are trying to change has a scheduled job or has been set to a fax forwarding number, the LCD will ask you if you want to change the name or number.

1 Do one of the following:
   - To change a stored One Touch number, press  , 2, 3, 1.

2 Do one of the following:
   - To change the stored data, press 1. Go to step 3.
   - To exit without making a change, press .

3 Edit the number and name using the following instruction. When you are finished editing, press OK.
   - To edit the stored name or number, press or to position the cursor under the character you want to change and press . Then enter the correct character.

4 Press .
Deleting One Touch and Speed Dial numbers

If you try to delete a One Touch or Speed Dial number, the LCD will show the name or number already stored there. If the One Touch or Speed Dial number you are trying to delete has a scheduled job or has been set to a fax forwarding number, the LCD will ask you if you want to change the name or number.

1. Do one of the following:
   - To delete a stored One Touch number, press 2, 3, 1.
   - To delete a stored Speed Dial number, press 2, 3, 2.

2. To delete the stored data, press 2.

3. Do one of the following:
   - To confirm the stored data will be deleted, press 1.
   - To exit without deleting the stored data, press 2.

4. Press .
How to copy

The following steps show the basic copy operation. For details about each option, see Advanced User’s Guide on the CD-ROM.

1. When you want to make a copy, press \( \text{(COPY)} \) to illuminate it in green.
   - Make sure you are in COPY mode.

   ![COPY mode illustration]

   - The LCD shows:

     ![LCD display]

   - The default setting is FAX mode. You can change the amount of time that the machine stays in COPY mode after the last copy operation. (See Advanced User’s Guide: Mode Timer.)

2. Place the document face down in the ADF. (See Using the automatic document feeder (ADF) page 18.)

3. Press \( \text{ } \).

Stop copying

To stop copying, press \( \text{ } \).
Replacing the consumable items

The machine will indicate when it is time to replace the consumable items. (See Replacing the toner cartridge page 40 and Replacing the drum unit page 45.)

<table>
<thead>
<tr>
<th>Toner Cartridge Type 1195E (for Europe)</th>
<th>Toner Cartridge Type 1195S (for Asia)</th>
<th>Drum Unit 1195</th>
</tr>
</thead>
<tbody>
<tr>
<td>See Replacing the toner cartridge page 40.</td>
<td>See Replacing the drum unit page 45.</td>
<td></td>
</tr>
</tbody>
</table>

**Note**

- Discard the used consumable according to local regulations, keeping it separate from domestic waste. If you have questions, call your local waste disposal office. (See Product Safety Guide: Recycling information in accordance with the WEEE (2002/96/EC) and Battery (2006/66/EC) Directives.)
- We recommend placing used consumable items on a piece of paper to prevent accidentally spilling or scattering the material inside.
- If you use paper that is not a direct equivalent for the recommended paper, the life of consumable items and machine parts may be reduced.
- The projected life of the toner cartridge is based on ISO/IEC 19752. Frequency of replacement will vary depending on the complexity of printed pages, percentage of coverage and type of media used.
Replacing the toner cartridge

The toner cartridge can print approximately 2,600 pages $^1$. Actual page count will vary depending on your average type of document. When a toner cartridge is running low, the LCD shows Toner Low.

The toner cartridge that comes supplied with the machine will need to be replaced after approximately 1,000 pages $^1$.

$^1$ Approx. cartridge yield is declared in accordance with ISO/IEC 19752.

Note

• It is a good idea to keep a new toner cartridge ready for use when you see the Toner Low warning.
• To ensure high quality printing, we recommend that you use only our branded toner cartridges. When you want to buy toner cartridges, please call your service representative or local dealer.
• We recommend that you clean the machine when you replace the toner cartridge. See Cleaning the machine $^{>}$ page 49.
• If you change the print density setting for lighter or darker printing, the amount of toner used will change.
• Wait to unpack the toner cartridge until immediately before you put it into the machine.

Toner Low

If the LCD shows Toner Low, buy a new toner cartridge and have it ready before you get a Replace Toner message.

Replace Toner

When the following message appears on the LCD, you need to replace the toner cartridge:

The machine will stop printing until you replace the toner cartridge. A new genuine our branded toner cartridge will reset the Replace Toner mode.

Note

To force the machine to continue printing after the LCD shows Replace Toner, set the machine to Continue mode (✓, 1, 7, and choose Continue). The machine will continue printing until the LCD shows Toner Ended. (For details about the Toner settings, see Advanced User’s Guide: Toner Settings.)

Toner Ended

The machine stops printing until you replace the toner cartridge with a new one. (See Replacing the toner cartridge $^{>}$ page 41.)
Replacing the toner cartridge

1. Open the front cover, and then leave the machine turned on for 10 minutes for the internal fan to cool the extremely hot parts inside the machine.

2. After the machine has cooled down, turn off the machine’s power switch.

**WARNING**

**HOT SURFACE**

After you have just used the machine, some internal parts of the machine will be extremely hot. Wait for the machine to cool down before you touch the internal parts of the machine.

3. Take out the drum unit and toner cartridge assembly.

**Important**

- We recommend that you place the drum unit and/or the toner cartridge on a clean, flat, level, stable surface with a sheet of disposable paper or cloth underneath it in case you accidentally spill or scatter toner.

- Handle the toner cartridge carefully. If toner scatters on your hands or clothes, immediately wipe or wash it off with cold water.
• To prevent damage to the machine caused by static electricity, DO NOT touch the electrodes shown in the illustration.

4 Push down the green lock lever and take the toner cartridge out of the drum unit.

---

**WARNING**

DO NOT put a toner cartridge or a toner cartridge and drum unit assembly into a fire. It could explode, resulting in injuries.

---

**DO NOT** use flammable substances, any type of spray, or an organic solvent/liquid containing alcohol or ammonia to clean the inside or outside of the machine. Doing so could cause a fire. Instead, use only a dry, lint-free cloth. (See Product Safety Guide: General precautions.)

---

**Important**

To avoid print quality problems, DO NOT touch the shaded parts shown in the illustrations.

---

Be careful not to inhale toner.
Routine maintenance

Important

- Unpack the toner cartridge just before you put it in the machine. If a toner cartridge is left unpacked for a long time, the toner life will be shortened.
- If an unpacked drum unit is put in direct sunlight or room light, the unit may be damaged.
- This machine is designed to work with toner of a particular specification and will work to a level of optimum performance when used with our branded toner cartridges. We cannot guarantee this optimum performance if toner or toner cartridges of other specifications are used. We do not therefore recommend the use of cartridges other than our branded cartridges with this machine, or the refilling of empty cartridges with toner from other sources. If damage is caused to the drum unit or other parts of this machine as a result of the use of toner or toner cartridges other than our branded products due to the incompatibility or lack of suitability of those products with this machine, any repairs required as a result may not be covered by the warranty.

Note

- Be sure to seal up the toner cartridge tightly in a suitable bag so that toner powder does not spill out of the cartridge.
- Discard the used consumable according to local regulations, keeping it separate from domestic waste. If you have questions, call your local waste disposal office. (See Product Safety Guide: Recycling information in accordance with the WEEE (2002/96/EC) and Battery (2006/66/EC) Directives.)

Unpack the new toner cartridge. Hold the cartridge level with both hands and gently shake it from side to side several times to spread the toner evenly inside the cartridge.

Pull off the protective cover.
Important
Put the toner cartridge in the drum unit immediately after you have removed the protective cover. To prevent any degradation to the print quality, DO NOT touch the shaded parts shown in the illustration.

Note
Make sure that you put in the toner cartridge correctly or it may separate from the drum unit.

7 Put the new toner cartridge firmly into the drum unit until you hear it lock into place. If you put it in correctly, the green lock lever will lift automatically.
Clean the corona wire inside the drum unit by gently sliding the blue tab from left to right and right to left several times.

**Note**
Be sure to return the tab to the home position (↑) (1). If you do not, printed pages may have a vertical stripe.

Put the drum unit and toner cartridge assembly back into the machine. Close the front cover.

**Note**
After replacing the toner cartridge, DO NOT turn off the machine’s power switch or open the front cover until the LCD clears the Please Wait message and returns to Ready mode.

### Replacing the drum unit

A new drum unit can print approximately 12,000 A4 or Letter size single-sided pages.

**Important**
For best performance, use only a genuine our branded drum unit and genuine our branded toner units. Printing with a third-party drum unit or toner unit may reduce not only the print quality but also the quality and life of the machine itself. Warranty coverage may not apply to problems caused by the use of a third-party drum or toner unit.

**Drum Error**
The corona wire has become dirty. Clean the corona wire in the drum unit. (See *Cleaning the corona wire* page 52.)

If you cleaned the corona wire and Drum Error was not cleared, replace the drum unit with a new one.

**Replace Drum**

Please replace the drum unit with a new one. We recommend a genuine our branded drum unit be installed at this time.

After replacing, reset the drum counter by following the instructions included with the new drum unit.
Drum Stop

We cannot guarantee the print quality. Please replace the drum unit with a new one. We recommend a genuine our branded drum unit be installed at this time.

After replacing, reset the drum counter by following the instructions included with the new drum unit.

Replacing the drum unit

Important

- While removing the drum unit, handle it carefully because it may contain toner. If toner scatters on your hands or clothes, immediately wipe or wash it off with cold water.

- Every time you replace the drum unit, clean the inside of the machine. (See Cleaning the machine page 49.)

- Unpack the drum unit just before you put it in the machine. Exposure to direct sunlight or room light may damage the drum unit.

1 Open the front cover, and then leave the machine turned on for 10 minutes for the internal fan to cool the extremely hot parts inside the machine.

2 After the machine has cooled down, turn off the machine’s power switch.

WARNING

HOT SURFACE

After you have just used the machine, some internal parts of the machine will be extremely hot. Wait for the machine to cool down before you touch the internal parts of the machine.
3 Take out the drum unit and toner cartridge assembly.

4 Push down the green lock lever and take the toner cartridge out of the drum unit.

**Important**
- We recommend that you place the drum unit and/or the toner cartridge on a clean, flat, level, stable surface with a sheet of disposable paper or cloth underneath it in case you accidentally spill or scatter toner.
- Handle the toner cartridge carefully. If toner scatters on your hands or clothes, immediately wipe or wash it off with cold water.
- To prevent damage to the machine caused by static electricity, DO NOT touch the electrodes shown in the illustration.

**WARNING**
DO NOT put a toner cartridge or a toner cartridge and drum unit assembly into a fire. It could explode, resulting in injuries.
DO NOT use flammable substances, any type of spray, or an organic solvent/liquid containing alcohol or ammonia to clean the inside or outside of the machine. Doing so could cause a fire. Instead, use only a dry, lint-free cloth.
(See Product Safety Guide: General precautions.)

Be careful not to inhale toner.

**Important**
To avoid print quality problems, DO NOT touch the shaded parts shown in the illustrations.

**Note**
- Be sure to seal up the used drum unit tightly in a bag so that toner powder does not spill out of the unit.
- Discard the used consumable according to local regulations, keeping it separate from domestic waste. If you have questions, call your local waste disposal office. (See Product Safety Guide: Recycling information in accordance with the WEEE (2002/96/EC) and Battery (2006/66/EC) Directives.)

5 Unpack the new drum unit.
Put the toner cartridge firmly into the new drum unit until it locks into place. If you put the cartridge in correctly, the green lock lever will lift automatically.

Note
Make sure that you put in the toner cartridge correctly or it may separate from the drum unit.

Put the new drum unit and toner cartridge assembly in the machine.

Cleaning the machine

Clean the outside and inside of the machine regularly with a dry, lint-free cloth. When you replace the toner cartridge or the drum unit, make sure that you clean the inside of the machine. If printed pages are stained with toner, clean the inside of the machine with a dry, lint-free cloth.

WARNING

DO NOT use flammable substances, any type of spray, or an organic solvent/liquid containing alcohol or ammonia to clean the inside or outside of the machine. Doing so could cause a fire. Instead, use only a dry, lint-free cloth.
(See Product Safety Guide: General precautions.)

Be careful not to inhale toner.

Important
Use neutral detergents. Cleaning with volatile liquids such as thinner or benzine will damage the surface of the machine.
Cleaning the outside of the machine

1. Turn off the machine. Unplug the telephone line cord first, disconnect all cables, and then unplug the power cord from the electrical socket.
2. Pull the paper tray completely out of the machine.
3. Wipe the outside of the machine with a dry, lint-free soft cloth to remove dust.
4. Remove any paper that is in the paper tray.
5. Wipe the inside and the outside of the paper tray with a dry, lint-free soft cloth to remove dust.
6. Re-load the paper and put the paper tray firmly back in the machine.
7. Plug the machine’s power cord back into the electrical socket first, connect all cables, and then plug in the telephone line cord. Turn on the machine.

Cleaning the scanner glass

1. Turn off the machine’s power switch. Unplug the telephone line cord first, disconnect all cables, and then unplug the power cord from the AC power outlet.
2. Lift the control panel cover (1). Carefully remove dirt from the glass strip (2) and the white bar (3) above it with a soft lint-free cloth moistened with water.
Cleaning the document feed

1. Turn off the machine’s power switch. Unplug the telephone line cord first, disconnect all cables, and then unplug the power cord from the AC power outlet.

2. Lift the control panel cover (1). Carefully remove dirt from the document feed (2) with a soft lint-free cloth.

3. Close the control panel cover.

Note
In addition to cleaning the glass strip with a soft lint-free cloth moistened with water, run your finger tip over the glass to see if you can feel anything on it. If you feel dirt or debris, clean the glass again concentrating on that area. You may need to repeat the cleaning process three or four times. To test, make a copy after each cleaning.

4. Plug the machine’s power cord back into the electrical socket first, connect all cables, and then plug in the telephone line cord. Turn on the machine.

3 Close the control panel cover.
Cleaning the corona wire

If you have print quality problems, clean the corona wire as follows:

1. Open the front cover, and then leave the machine turned on for 10 minutes for the internal fan to cool the extremely hot parts inside the machine.

2. After the machine has cooled down, turn off the machine’s power switch.

**WARNING**

**HOT SURFACE**

After you have just used the machine, some internal parts of the machine will be extremely hot. Wait for the machine to cool down before you touch the internal parts of the machine.

3. Slowly take out the drum unit and toner cartridge assembly.

**Important**

- We recommend that you place the drum unit and toner cartridge assembly on a clean, flat surface with a sheet of disposable paper or cloth underneath it in case you accidentally spill or scatter toner.
- Handle the toner cartridge carefully. If toner scatters on your hands or clothes, wipe or wash it off with cold water at once.
• To prevent damage to the machine caused by static electricity, DO NOT touch the electrodes shown in the illustration.

4. Clean the corona wire inside the drum unit by gently sliding the blue tab from right to left and left to right several times.

5. Put the drum unit and toner cartridge assembly back into the machine. Close the front cover.

Cleaning the drum unit

If you have print quality problems, the drum may have foreign material, such as glue from a label stuck on the drum surface. Follow the steps below to solve the problem.

1. Prepare a few sheets of A4 or Letter size paper.
2. Make sure the machine is in Ready mode.
3. Open the back cover (face-up output tray).

Note

Be sure to return the tab to the home position (A) (1). If you do not, printed pages may have a vertical stripe.
4 Open the manual feed slot cover.

5 Press C and  at the same time. The Drum Cleaning message will appear on the LCD.

6 Using both hands, slide the manual feed paper guides to the width of the paper that you are going to use.

7 Using both hands, put one piece of A4 or Letter size paper in the manual feed slot until the top edge of the paper touches the paper feed roller. When you feel the machine pull in the paper, let go. The machine will start the Drum Cleaning process.

8 When the machine has finished cleaning, the machine returns to Ready mode.

Note

- The machine makes a mechanical noise during the Drum Cleaning process because the machine rotates the drum in reverse. This noise is not due to a malfunction of the machine.

- DO NOT put more than one sheet of paper in the manual feed slot at any one time, as it may cause a jam.

- If the paper in the manual feed slot is not A4 or Letter size, the machine will stop the Drum Cleaning process and eject the paper.

- Make sure that the paper is straight and in the correct position in the manual feed slot. If it is not, it may not be fed correctly, resulting in a paper jam.

- DO NOT close the back cover (face-up output tray) during the Drum Cleaning process. The machine will stop the Drum Cleaning process and it may cause a paper jam.
9 Repeat steps 5 to 8 two more times using a new blank sheet of paper each time. Upon completion please discard the used paper.

10 Close the back cover (face-up output tray) and the manual feed slot cover.

If the problem has not been solved, follow the steps below:

1 Open the front cover, and then leave the machine turned on for 10 minutes for the internal fan to cool the internal parts of the machine that are extremely hot.

2 After the machine has cooled down, turn off the machine’s power switch.

**WARNING**

**HOT SURFACE**

After you have just used the machine, some internal parts of the machine will be extremely hot. Wait for the machine to cool down before you touch the internal parts of the machine.

3 Slowly take out the drum unit and toner cartridge assembly.

**Important**

- We recommend that you put the drum unit and toner cartridge assembly on a clean, flat surface with a sheet of disposable paper or cloth underneath it in case you accidentally spill or scatter toner.
- Handle the toner cartridge carefully. If toner scatters on your hands or clothes, immediately wipe or wash it off with cold water.
• To prevent damage to the machine caused by static electricity, DO NOT touch the electrodes shown in the illustration.

4 Push down the green lock lever and take the toner cartridge out of the drum unit.

5 Put the print sample in front of the drum unit, and find the exact position of the poor print.

Important
To avoid print quality problems, DO NOT touch the shaded parts shown in the illustrations.
6 **Turn the drum unit gear by hand while looking at the surface of the drum roller (1).**

7 **When you have found the mark on the drum that matches the print sample, wipe the surface of the drum roller with a dry cotton swab until the dust or glue on the surface comes off.**

8 **Put the toner cartridge back into the drum unit until it locks into place. If you put the cartridge in correctly, the green lock lever will lift automatically.**

**Important**

DO NOT clean the surface of the photosensitive drum with a sharp object.
Put the drum unit and toner cartridge assembly back in the machine.

Close the front cover.

Cleaning the paper pick-up rollers

If you have paper feed problems, clean the pick-up rollers as follows:

1. Turn off the machine. Unplug the power cord from the electrical socket.
2. Pull the paper tray completely out of the machine.
3. Tightly wring out a lint-free cloth soaked in lukewarm water, and then wipe the separator pad (1) on the paper tray to remove dust.
4 Wipe the two pick-up rollers (1) inside of the machine to remove dust.

Checking the machine

Checking the Page Counters

You can see the machine’s Page Counters for copies, printed pages, reports, lists and faxes or a summary total.

1 Press , 5, 2.

2 Press ▲ or ▼ to see Total, Fax/List, Copy or Print.

3 Press □.

Checking the remaining life of parts

You can see the machine’s parts life on the LCD.

1 Press , 5, 3.

2 Press □.

5 Put the paper tray back in the machine.

6 Plug the machine’s power cord back into the electrical socket. Turn on the machine.
If you think there is a problem with your machine, check each of the items below first and follow the troubleshooting tips.

**Identifying your problem**

First, check the following:

- The machine’s power cord is connected correctly and the machine’s power switch is turned on. If the machine does not turn on after connecting the power cord, see *Other difficulties* page 79.
- All of the protective parts have been removed.
- Paper is inserted correctly in the paper tray.
- LCD Messages (See *Error and maintenance messages* page 61.)

If you did not solve your problem with the above checks, identify your problem and then go to the page suggested below.

**Paper handling and Printing problems:**

- *Paper handling difficulties* page 78
- *Printing received faxes* page 75

**Telephone and Fax problems:**

- *Telephone line or connections* page 75
- *Handling incoming calls* page 77
- *Receiving Faxes* page 76
- *Sending faxes* page 77

**Copying problems:**

- *Copying difficulties* page 78
Error and maintenance messages

As with any sophisticated office product, errors may occur and consumable items may need to be replaced. If this happens, your machine identifies the error or required routine maintenance and shows the appropriate message. The most common error and maintenance messages are shown below.

<table>
<thead>
<tr>
<th>Error Message</th>
<th>Cause</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>BT Call Sign On (U.K. only)</td>
<td>BT Call Sign is set to On. You cannot change the Receive Mode from Manual to another mode.</td>
<td>Set BT Call Sign to Off. See Advanced User’s Guide: BT Call Sign (U.K. only).</td>
</tr>
<tr>
<td>Cartridge Error</td>
<td>The toner cartridge is not installed correctly.</td>
<td>Pull out the drum unit and remove the toner cartridge, then re-install the toner cartridge in the drum unit.</td>
</tr>
<tr>
<td>Comm.Error</td>
<td>Poor telephone line quality caused a communication error.</td>
<td>Try sending the fax again or connect the machine to another telephone line. If the problem continues, call the telephone company and ask them to check your telephone line.</td>
</tr>
<tr>
<td>Connection Fail</td>
<td>You tried to poll a fax machine that is not in Polled Waiting mode.</td>
<td>Check the other fax machine’s polling setup.</td>
</tr>
<tr>
<td>Cooling Down Wait for a while</td>
<td>The temperature of the drum unit or toner cartridge is too hot. The machine will pause its current print job and go into cooling down mode. During the cooling down mode, you will hear the cooling fan running while the LCD shows Cooling Down, and Wait for a while.</td>
<td>Make sure that you can hear the fan in the machine spinning and that the exhaust outlet is not blocked by something. If the fan is spinning, remove any obstacles that surround the exhaust outlet, and then leave the machine turned on but do not use it for several minutes. Turn the power switch off, wait a few seconds, and then turn it on again. Leave the machine for 15 minutes with the power on.</td>
</tr>
<tr>
<td>Cover is Open</td>
<td>The front cover is not completely closed.</td>
<td>Close the front cover of the machine.</td>
</tr>
<tr>
<td>Cover is Open</td>
<td>The Control panel cover is not completely closed.</td>
<td>Close the Control panel cover of the machine.</td>
</tr>
<tr>
<td>Cover is Open</td>
<td>The Control panel cover was open when you loaded a document.</td>
<td>Close the Control panel cover of the machine, then press .</td>
</tr>
<tr>
<td>Cover is Open</td>
<td>The fuser cover is not completely closed or paper was jammed in the back of the machine when the power was turned on.</td>
<td>▪ Close the fuser cover of the machine. ▪ Make sure paper is not jammed inside the back of the machine, and then close the fuser cover and press .</td>
</tr>
<tr>
<td>Disconnected</td>
<td>The other person or other person’s fax machine stopped the call.</td>
<td>Try to send or receive again.</td>

<td>The machine’s memory is full.</td>
<td><strong>Fax sending or copy operation in process</strong></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Do one of the following:</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Press  to send or copy the scanned pages.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Press  and wait until the other operations in progress finish, and then try again.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Clear the faxes from the memory.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Print the faxes that are stored in the memory to restore the memory to 100%. Then turn off Fax Storage to avoid storing more faxes in the memory. (See Advanced User’s Guide: Printing a fax from the memory and Fax Storage.)</td>
</tr>
<tr>
<td>Print Unable XX</td>
<td>The machine has a mechanical problem.</td>
<td>Do one of the following:</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Turn the power switch off, wait a few seconds, and then turn it on again. Leave the machine for 15 minutes with the power on.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- If the problem continues, call your service representative or local dealer.</td>
</tr>
<tr>
<td>Replace Drum</td>
<td>It is time to replace the drum unit.</td>
<td>Replace the drum unit.</td>
</tr>
<tr>
<td></td>
<td></td>
<td><em>(See Replacing the drum unit page 45.)</em></td>
</tr>
<tr>
<td>Replace Toner</td>
<td>The toner cartridge is at the end of its life. The machine will stop printing until you replace the toner cartridge. While memory is available, faxes will be stored in the memory. If you have set the Toner setting to Stop, replace the toner cartridge with a new and unused our branded toner cartridge. This will reset the Replace Toner mode. <em>(See Replacing the toner cartridge page 40.)</em> If you have set the Toner setting to Continue, the machine will continue to print data until the LCD shows Toner Ended. For how to operate the machine in Continue mode, see Advanced User’s Guide: Toner Settings.</td>
<td></td>
</tr>
<tr>
<td>Scan Unable XX</td>
<td>The machine has a mechanical problem.</td>
<td>- Turn the power switch off, wait a few seconds, and then turn it on again. Leave the machine for 15 minutes with the power on.</td>

<td>------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Size mismatch</td>
<td>The paper in the tray is not a correct size.</td>
<td>Load an appropriate size of paper in the tray, and re-set the “Paper Size” (1, 2, 2). (See Paper Size ▶ page 13.)</td>
</tr>
<tr>
<td>Toner Ended</td>
<td>It is time to replace the toner cartridge.</td>
<td>Replace the toner cartridge with a new one. (See Replacing the toner cartridge ▶ page 40.)</td>
</tr>
<tr>
<td>Toner Low</td>
<td>If the LCD shows Toner Low you can still print; however, the machine is telling you that the toner cartridge is near the end of its life.</td>
<td>Order a new toner cartridge now so a replacement toner cartridge will be available when the LCD shows Replace Toner or Toner Ended.</td>
</tr>
</tbody>
</table>
Transferring your faxes or Fax Journal report

If the LCD shows:
- Init Unable XX
- Print Unable XX
- Scan Unable XX

We recommend transferring your faxes to another fax machine. (See Transferring faxes to another fax machine ▸ page 65.)

You can also transfer the Fax Journal report to see if there are any faxes you need to transfer. (See Transferring Fax Journal report to another fax machine ▸ page 65.)

Note

If there is an error message on the machine’s LCD, after the faxes have been transferred, disconnect the machine from the power source for several minutes, and then reconnect it.

Transferring faxes to another fax machine

If you have not set up your Station ID, you cannot enter fax transfer mode. (See Quick Setup Guide: Enter personal information (Station ID).)

1. Press 9, 0, 1.

2. Do one of the following:
   - If the LCD shows No Data, there are no faxes left in the machine’s memory. Press .
   - Enter the fax number to which faxes will be forwarded. Press .

Transferring Fax Journal report to another fax machine

If you have not set up your Station ID, you cannot enter fax transfer mode. (See Quick Setup Guide: Enter personal information (Station ID).)

1. Press 9, 0, 2.

2. Enter the fax number to which the Fax Journal report will be forwarded.

3. Press .
Document Jams

Document was not inserted or fed properly, or was too long

1. Open the control panel cover.

2. Carefully pull the jammed document toward the front of the machine.

3. Close the control panel cover.

4. Press 📅.

Paper Jams

Always remove all paper from the paper tray and straighten the stack when you add new paper. This helps prevent multiple sheets of paper from feeding through the machine at the same time and prevents paper jams.

Paper is jammed in the standard paper tray

If the LCD shows Jam Tray, follow these steps:

1. Pull the paper tray completely out of the machine.
2 Use both hands to slowly pull out the jammed paper.

3 Make sure the paper is below the maximum paper mark (▼ ▼) (1) of the paper tray. While pressing the paper-guide release lever, slide the paper guides to fit the paper size. Make sure that the guides are firmly in the slots. (See Loading paper in the standard paper tray page 6.)

Note
Pulling out the jammed paper downwards allows you to remove the paper more easily.

4 Put the paper tray firmly back in the machine.

Paper is jammed at the back of the machine

If the LCD shows Jam Rear, a paper jam occurred behind the back cover. Follow these steps:

1 Open the front cover, and then leave the machine turned on for 10 minutes for the internal fan to cool the extremely hot parts inside the machine.
2 After the machine has cooled down, turn off the machine’s power switch.

**WARNING**

**HOT SURFACE**

After you have just used the machine, some internal parts of the machine will be extremely hot. Wait for the machine to cool down before you touch the internal parts of the machine.

3 Slowly take out the drum unit and toner cartridge assembly. The jammed paper may be pulled out with the drum unit and toner cartridge assembly, or this may release the paper so you can pull it out from inside of the machine.
Important

• We recommend that you place the drum unit and the toner cartridge on a clean, flat surface with a sheet of disposable paper or cloth underneath it in case you accidentally spill or scatter toner.

• Handle the toner cartridge carefully. If toner scatters on your hands or clothes, immediately wipe or wash it off with cold water.

• To prevent damage to the machine caused by static electricity, DO NOT touch the electrodes shown in the illustration.

Open the back cover (face-up output tray).

Pull down the blue labeled tabs at the left and right hand sides to open the fuser cover (1).
6. Using both hands, gently pull the jammed paper out of the fuser unit.

7. Close the fuser cover and the back cover (face-up output tray).

8. Put the drum unit and toner cartridge assembly back into the machine.

9. Close the front cover. If the machine does not start printing automatically, press 📢.

---

**Paper is jammed inside the machine**

If the LCD shows Jam Inside, follow these steps:

1. Open the front cover, and then leave the machine turned on for 10 minutes for the internal fan to cool the extremely hot parts inside the machine.

2. After the machine has cooled down, turn off the machine’s power switch.
WARNING

HOT SURFACE

After you have just used the machine, some internal parts of the machine will be extremely hot. Wait for the machine to cool down before you touch the internal parts of the machine.

3 Slowly take out the drum unit and toner cartridge assembly. The jammed paper may be pulled out with the drum unit and toner cartridge assembly, or this may release the paper so you can pull it out from inside of the machine.

Important

• We recommend that you put the drum unit and toner cartridge assembly on a piece of disposable paper or cloth in case you accidentally spill or scatter toner.

• Handle the toner cartridge carefully. If toner scatters on your hands or clothes, immediately wipe or wash it off with cold water.
• To prevent damage to the machine from static electricity, DO NOT touch the electrodes shown in the illustration.

4 Push down the green lock lever and take the toner cartridge out of the drum unit. Clear the jammed paper if there is any inside the drum unit.

❗ Important
To avoid print quality problems, DO NOT touch the shaded parts shown in the illustrations.
5 Put the toner cartridge back into the drum unit until it clicks into place. If you put the cartridge in correctly, the green lock lever will lift automatically.

6 If you could not pull the jammed paper out of the inside of the machine, take the paper tray completely out of the machine.

7 Pull the jammed paper out of the paper tray opening.

Note
Pulling the jammed paper downward allows you to remove the paper easier.

8 Put the paper tray back in the machine.
9 Put the drum unit and toner cartridge assembly back in the machine.

10 Close the front cover of the machine. If the machine does not start printing automatically, press  .
If you are having difficulty with your machine

**Important**

- If you think there is a problem with your machine, check the chart below and follow the troubleshooting tips. You can solve most problems by yourself.
- If you think there is a problem with the way your faxes look, make a copy first. If the copy looks good, the problem may not be your machine. Check the chart below and follow the troubleshooting tips.
- Using third party supplies may affect the print quality, hardware performance, and machine reliability.

### Printing received faxes

# Receiving Faxes

<table>
<thead>
<tr>
<th>Difficulties</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cannot receive a fax.</td>
<td>Check all line cord connections. Make sure the telephone line cord is plugged into the telephone wall socket and the LINE socket of the machine. If you subscribe to DSL or VoIP services, please contact your service provider for connection instructions. Make sure the machine is in the correct Receive Mode. This is determined by the external devices and telephone subscriber services you have on the same line as your machine. (See Receive Mode settings page 24.) If you have a dedicated fax line and want your machine to automatically answer all incoming faxes, you should select <strong>Fax Only</strong> mode. If your machine shares a line with an external answering machine, you should select the <strong>External TAD</strong> mode. In <strong>External TAD</strong> mode, your machine will automatically receive incoming faxes and voice callers will be able to leave a message on your answering machine. If your machine shares a line with other telephones and you want it to automatically answer all incoming faxes, you should select the <strong>Fax/Tel</strong> mode. In <strong>Fax/Tel</strong> mode, your machine will automatically receive faxes and produce a fast/double-ring to alert you to answer voice calls. If you do not want your machine to automatically answer any incoming faxes, you should select the <strong>Manual</strong> mode. In <strong>Manual</strong> mode, you must answer every incoming call and activate the machine to receive faxes. Another device or service at your location may be answering the call before your machine answers. To test this, lower the ring delay setting:</td>
</tr>
<tr>
<td></td>
<td>- If the answer mode is set to <strong>Fax Only</strong> or <strong>Fax/Tel</strong>, reduce the ring delay to 1 ring. (See Ring Delay page 24.)</td>

## Receiving Faxes (continued)

<table>
<thead>
<tr>
<th>Difficulties</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Cannot receive a fax.</strong></td>
<td>If you are using a telephone answering machine (External TAD mode) on the same line as your machine, make sure your answering machine is set up correctly. (See Connecting an external TAD page 28.)</td>
</tr>
<tr>
<td>(continued)</td>
<td>1. Connect the external TAD as shown in the illustration on page 28.</td>
</tr>
<tr>
<td></td>
<td>2. Set your answering machine to answer in one or two rings.</td>
</tr>
<tr>
<td></td>
<td>3. Record the outgoing message on your answering machine.</td>
</tr>
<tr>
<td></td>
<td>- Record five seconds of silence at the beginning of your outgoing message.</td>
</tr>
<tr>
<td></td>
<td>- Limit your speaking to 20 seconds.</td>
</tr>
<tr>
<td></td>
<td>- End your outgoing message with your Remote Activation Code for people sending manual faxes. For example: “After the beep, leave a message or press *51 and Start to send a fax.”</td>
</tr>
<tr>
<td></td>
<td>4. Set your answering machine to answer calls.</td>
</tr>
<tr>
<td></td>
<td>5. Set your machine’s Receive Mode to External TAD. (See Receive Mode settings page 24.)</td>
</tr>
<tr>
<td></td>
<td>Make sure your machine’s Fax Detect feature is turned On. Fax Detect is a feature that allows you to receive a fax even if you have answered the call on an external or extension telephone. (See Fax Detect page 25.)</td>
</tr>
<tr>
<td></td>
<td>If you often get transmission errors due to possible interference on the telephone line, try changing the Compatibility setting to Basic(for VoIP). (See Telephone line interference/VoIP page 80.)</td>

## Handling incoming calls

<table>
<thead>
<tr>
<th>Difficulties</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>The machine ‘hears’ a voice as a CNG tone.</td>
<td>If Fax Detect is set to On, your machine is more sensitive to sounds. It may mistakenly interpret certain voices or music on the line as a fax machine calling and respond with fax receiving tones. Deactivate the machine by pressing . To avoid this problem you can try Turning Fax Detect Off. (See Fax Detect page 25.)</td>
</tr>
<tr>
<td>Sending a fax call to the machine.</td>
<td>If you answered on an external or extension telephone, press your Remote Activation Code (default setting is *51). When your machine answers, hang up.</td>
</tr>
</tbody>
</table>

---

(*Note: The text is from the Troubleshooting section of a user manual. The content is about resolving issues related to receiving and sending faxes, as well as handling incoming calls.*)
Handling incoming calls (continued)

<table>
<thead>
<tr>
<th>Difficulties</th>
<th>Suggestions</th>
</tr>
</thead>
</table>
| Custom features on a single line. | If you have Call Waiting, Call Waiting/Caller ID, Caller ID, Voice Mail, an answering machine, an alarm system or other custom feature on a single telephone line with your machine, it may create a problem sending or receiving faxes.  
*For Example:* If you subscribe to Call Waiting or some other custom service and its signal comes through the line while your machine is sending or receiving a fax, the signal can temporarily interrupt or disrupt the fax. The ECM feature should help overcome this problem. This condition is related to the telephone system industry and is common to all devices that send and receive information on a single, shared line with custom features. If avoiding a slight interruption is crucial to your business, a separate line with no custom features is recommended. |

Menu access difficulties

<table>
<thead>
<tr>
<th>Difficulties</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>The machine beeps when you try to access the Setup Receive and Setup Send menus.</td>
<td>If FAX is not illuminated, press it to turn on FAX mode. The Setup Receive settings (2, 1) and Setup Send settings (2, 2) are available only when the machine is in FAX mode.</td>
</tr>
</tbody>
</table>

Copying difficulties

<table>
<thead>
<tr>

</table>

Paper handling difficulties

<table>
<thead>
<tr>
<th>Difficulties</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>The machine does not feed paper. The LCD shows No Paper or a Paper Jam message.</td>
<td></td>
</tr>
</tbody>
</table>
- If there is no paper, load a new stack of paper into the paper tray.  
- If there is paper in the paper tray, make sure it is straight. If the paper is curled, you should straighten it. Sometimes it is helpful to remove the paper, turn the stack over and put it back into the paper tray.  
- Reduce the amount of paper in the paper tray, and then try again.  
- Clean the paper pick-up roller. See *Routine maintenance* page 39.  
- If the LCD shows the Paper Jam message and you still have a problem, see *Error and maintenance messages* page 61. |
| Documents do not feed or document are skewed. | Clean the document feed rollers. See *Cleaning the document feed* page 51. |
| What paper can I use? | You can use thin paper, plain paper, bond paper, recycled paper, envelopes and labels that are made for laser machines. (For details, see *Acceptable paper and other print media* page 13.)  
You can load envelopes from the manual feed slot. |
| There is a paper jam. | Clear the jammed paper. (See *Paper Jams* page 66.) |
Troubleshooting

Print quality difficulties

<table>
<thead>
<tr>
<th>Difficulties</th>
<th>Suggestions</th>
</tr>
</thead>
</table>
| Printed pages are curled. | ■ Low quality thin or thick paper or not printing on the recommended side of the paper could cause this problem. Try turning over the stack of paper in the paper tray.  
■ Make sure that you choose the Paper Type that suits the print media type you are using. (See Acceptable paper and other print media page 13.)  
■ Too little or too much humidity or extreme temperatures can cause the paper to curl. (See General page 103.) |
| Printed pages are smeared.| The Paper Type setting may be incorrect for the type of print media you are using, or the print media may be too thick or have a rough surface. (See Acceptable paper and other print media page 13.) |
| Printouts are too light.  | ■ If this problem occurs when making copies or printing received faxes, set Toner Save to Off in the machine’s menu settings. (See Advanced User’s Guide: Toner Save.)  
■ Adjust the Print Density by pressing , 2, 1, 6 and then press ▶ to make the print darker. (See Advanced User’s Guide: Setting the Print Density.) |

Other difficulties

<table>
<thead>
<tr>
<th>Difficulties</th>
<th>Suggestions</th>
</tr>
</thead>
</table>
| The machine will not turn on. | Adverse conditions on the power connection (such as lightning or a power surge) may have triggered the machine’s internal safety mechanisms. Turn the machine off and unplug the power cord. Wait for ten minutes, then plug in the power cord and turn the machine on.  
If the problem is not solved, turn off the machine. Plug the power cord into a different known working outlet and turn on the machine. |
**Setting Dial Tone detection**

When you send a fax automatically, by default your machine will wait for a fixed amount of time before it starts to dial the number. By changing the Dial Tone setting to Detection you can make your machine dial as soon as it detects a dial tone. This setting can save a small amount of time when sending a fax to many different numbers. If you change the setting and start having problems with dialling you should change back to the default No Detection setting.

1 Press \(\#\), 0, 5.
2 Press \(\uparrow\) or \(\downarrow\) to choose Detection or No Detection. Press OK.
3 Press \(\#\).

**Telephone line interference/VoIP**

If you are having difficulty sending or receiving a fax due to possible interference on the telephone line, we recommend that you adjust the equalization for compatibility to reduce the modem speed for fax operations.

1 Press \(\#\), 2, 0, 1.
2 Press \(\uparrow\) or \(\downarrow\) to choose Basic(for VoIP), Normal or High.
   - Basic(for VoIP) cuts the modem speed to 9600 bps. When you change the Compatibility to Basic(for VoIP), the ECM feature is only available for fax sending.
   - For a standard telephone line: If you regularly experience interference on your standard telephone line try this setting.
   - If you are using VoIP: VoIP service providers offer fax support using various standards. If you regularly experience fax transmission errors try this setting.
   - Normal sets the modem speed at 14400 bps.
   - High sets the modem speed at 33600 bps.

Press OK.

3 Press \(\#\).

**Note**

VoIP (Voice over IP) is a type of phone system that uses an Internet connection, rather than a traditional phone line.
Troubleshooting

Improving the print quality

If the printout has a quality problem, make a copy. If the copy looks good, the problem is probably not the machine. Check the interface cable connections and the following steps first. And then, if you still have a print quality problem, check the chart below and follow the recommendations.

Note

We do not recommend the use of cartridges other than genuine our branded cartridges or the refilling of used cartridges with toner from other sources.

1. To get the best print quality, we suggest using the recommended paper. Check that you use paper that meets our specifications. (See Acceptable paper and other print media page 13.)

2. Check that the drum unit and toner cartridge are installed correctly.

<table>
<thead>
<tr>
<th>Examples of poor print quality</th>
<th>Recommendation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Faint</td>
<td>■ Take out the drum unit and toner cartridge assembly. Hold the assembly level with both hands and gently shake it from side to side several times to spread the toner evenly inside the cartridge.</td>
</tr>
<tr>
<td></td>
<td>■ Check if the Replace Toner Setting is set to Continue (Continue mode) by pressing 1, 7. (See Advanced User’s Guide: Toner settings.)</td>
</tr>
<tr>
<td></td>
<td>■ Check the machine’s environment. Conditions such as humidity, high temperatures, and so on, may cause this print fault. (See Product Safety Guide: Choose a safe location for your product.)</td>
</tr>
<tr>
<td></td>
<td>■ If the whole page is too light, Toner Save mode may be on. Turn off Toner Save in the machine’s menu settings.</td>
</tr>
<tr>
<td></td>
<td>■ Clean the corona wire of the drum unit. (See Cleaning the corona wire page 52.)</td>
</tr>
<tr>
<td></td>
<td>■ Put in a new toner cartridge. (See Replacing the toner cartridge page 40.)</td>
</tr>
<tr>
<td></td>
<td>■ Put in a new drum unit. (See Replacing the drum unit page 45.)</td>
</tr>
<tr>

|                               | The drum unit may be damaged. Put in a new drum unit. (See      |
|                               | Replacing the drum unit page 45.)                              |
### Troubleshooting

#### Black lines down the page

Printed pages have toner stains down the page.

- Clean the corona wire inside the drum unit by sliding the blue tab. (See **Cleaning the corona wire** page 52.)
- Make sure the blue tab of the corona wire is at the home position (▲).
- The drum unit may be damaged. Put in a new drum unit. (See **Replacing the drum unit** page 45.)
- The toner cartridge may be damaged. Put in a new toner cartridge. (See **Replacing the toner cartridge** page 40.)
- The fuser unit may be contaminated. Call your service representative or local dealer.

#### White lines down the page

- Check if the Replace Toner Setting is set to Continue (Continue mode), by pressing 1, 7. (See Advanced User’s Guide: **Toner Settings**.)
- Make sure that foreign material such as a torn piece of paper, sticky notes or dust are not inside the machine or around the drum unit and toner cartridge.
- The toner cartridge may be damaged. Put in a new toner cartridge. (See **Replacing the toner cartridge** page 40.)
- The drum unit may be damaged. Put in a new drum unit. (See **Replacing the drum unit** page 45.)

#### The print is skewed on the page.

- Make sure that the paper or other print media is loaded correctly in the paper tray and that the guides are not too tight or too loose against the paper stack.
- Set the paper guides correctly. (See **Loading paper** page 6.)
- If you are using the manual feed slot, see **Loading paper in the manual feed slot** page 8.
- The paper tray may be too full. (See **Loading paper** page 6.)
- Check the paper type and quality. (See **Acceptable paper and other print media** page 13.)
- Check for loose objects such as torn paper inside the machine.
- Verify that the two green envelope levers inside the back cover are set to the same position.
- Verify that the two grey Anti-Curl Levers inside the back cover are set to the same position.

---

The following reset functions are available:

1. Address & Fax
   - Address & Fax resets the following settings:
     - Address Book
       (One Touch Dial/Speed Dial/Setup Groups)
     - Programmed fax jobs in the memory
       (Polled TX, Delayed Fax)
     - Station ID
       (name and numbers)
     - Coverpage Note
       (comments)
     - Remote Fax Options
       (Remote Access Code, Fax Storage and Fax Forwarding)
     - Report settings
       (Transmission Verification Report/Tel Index List/Fax Journal)
     - Setting Lock password

2. All Settings
   - You can reset all the machine’s settings back to the factory default.
   - We strongly recommend you perform this operation when you dispose of the machine.

Note

Unplug the interface cable before you choose All Settings.
How to reset the machine

1. Press ①, 0.

2. Press ▲ or ▼ to display Reset. Press OK.

3. Press ▲ or ▼ to choose the type of reset function - Address & Fax or All Settings. Press OK.

4. Do one of the following:
   - To reset the settings, press 1 and go to step 5.
   - To exit without making changes, press 2 and go to step 6.

5. You will be asked to confirm you want to reboot the machine. Do one of the following:
   - To reboot the machine press 1. The machine will begin the reset.
   - To exit without rebooting the machine, press 2. Go to step 6.

6. Press ②.
On-screen programming

Your machine has been designed to be easy to use. The LCD provides on-screen programming using the menu keys.

We have created step by step on-screen instructions to help you program your machine. Simply follow the steps as they guide you through the menu selections and programming options.

Menu table

You can program your machine by using the Menu table page 93. These pages list the menu selections and options. Press followed by the menu numbers to program your machine. For example, to set Beeper volume to Low:

1. Press , 1, 3, 2.
2. Press ▲ or ▼ to choose Low.
3. Press OK.
4. Press .

How to access the menu mode

1. Press .
2. Choose an option.
   - Press 1 for General Setup menu.
   - Press 2 for Fax menu.
   - Press 3 for Copy menu.
   - Press 4 for Print Reports menu.
   - Press 5 for Machine Info. menu.
   - Press 9 for Service menu.1
   - Press 0 for Initial Setup menu.
1 This will appear only when the LCD shows an error message.

You can also scroll through each menu level by pressing ▲ or ▼ for the direction you want.

3. Press OK when the option you want appears on the LCD. The LCD will then show the next menu level.

4. Press ▲ or ▼ to scroll to your next menu selection.

5. Press OK. When you have finished setting an option, the LCD will show Accepted.

6. Press  to exit Menu mode.

Entering text

When setting certain menu selections, such as the Station ID, you will need to type text characters. The dial pad keys have letters printed on them. The keys: 0, # and * do not have printed letters because they are used for special characters.

Press the appropriate dial pad key the number of times shown in this reference table to access the character you want.

</table>

¹ When making a copy from one sheet
² Measured in accordance with the method described in RAL-UZ122.
³ Office equipment with LWAd>6.30 B (A) is not suitable for use in rooms where people require high levels of concentration. Such equipment should be placed in separate rooms because of the noise emission.
