How to Read the Manuals

Symbols Used in the Manuals

This manual uses the following symbols:

🌟 Important
Indicates points to pay attention to when using functions. This symbol indicates points that may result in the product or service becoming unusable or result in the loss of data if the instructions are not obeyed. Be sure to read these explanations.

ダウンロード
Indicates supplementary explanations of the machine’s functions, and instructions on resolving user errors.

[]
Indicates the names of keys on the machine’s display or control panels.

Disclaimer

To the maximum extent permitted by applicable laws, in no event will the manufacturer be liable for any damages whatsoever arising out of failures of this product, losses of documents or data, or the use or non-use of this product and operation manuals provided with it.

Make sure that you always copy or have backups of important documents or data. Documents or data might be erased due to your operational errors or malfunctions of the machine. Also, you are responsible for taking protective measures against computer viruses, worms, and other harmful software.

Displayed contents and illustrations on the screen vary depending on models or options.
1. Information about AirPrint

This machine supports AirPrint.

AirPrint is a standard feature for iOS and OS X / macOS. You can print with AirPrint without installing a printer driver for the machine.

Printing with AirPrint

When printing with AirPrint, multiple jobs cannot be accepted at a time. After printing a current job, proceed to print the next job.

Even though a print job for text and covers is canceled, the text may be printed anyway.

AirPrint can be used with printers that are networked with iOS devices or Mac. An AirPrint-enabled printer must be connected to the same network as iOS devices or Mac.
1. Information about AirPrint
2. Printing

Important

• Check that wireless settings are configured. If not, see Setup Guide to configure the settings.

Printing Files Using OS X / macOS

The following procedure is explained using macOS 10.13 as an example.

1. Open the file you want to print.
2. Click [Print...] on the [File] menu.
3. Select the machine in the [Printer:] list.
4. Click [Print].
   Printing starts.

Note

• Procedures for opening the printing preferences dialog box vary depending on the application. For details, see OS X / macOS manuals or Help.
Printing Files Using iOS

1. Open the file you want to print.
2. Tap 📑 (Share).
3. Tap 🌐 (Printer) or [Print].
4. Tap [Printer].
   Printer select screen is displayed.
5. Tap the machine’s name.
6. Tap [Print].
   Printing starts.
## 3. Appendix

This section explains troubleshooting and the procedure for changing certificates.

### Troubleshooting

#### Connection Problems

<table>
<thead>
<tr>
<th>Cause</th>
<th>Solution</th>
</tr>
</thead>
</table>
| AirPrint settings is disabled.       | Check whether the AirPrint settings is enabled or not. The settings is enabled by default.  
|                                      | For details, see page 8 "Check the Settings of AirPrint for the Machine". |
| The firmware version is not the latest. | Check whether the firmware version is the latest or not. If the version is not the latest, update it.  
|                                      | For details, see Firmware Update Guide.                                  |
Check the Settings of AirPrint for the Machine

You can check the settings of AirPrint using a web browser.

1. Start your web browser.
2. Enter "http://(the machine's IP address or host name)/" in the address bar.

   The top page of Web Image Monitor appears.

   If the machine’s host name has been registered to the DNS server, you can enter it.
3. Click [Network Settings].

4. Click the [AirPrint] tab.
5. In [AirPrint] in the setting menu, select [AirPrint using TLS on/off].

[AirPrint]: Specify whether or not to use AirPrint. If set to [Inactive], the following settings cannot be specified.

[AirPrint using TLS on/off]: Specify whether or not to connect via TSL when using AirPrint. If set to [Active], Secure AirPrint is selected as the printer driver. If set to [Inactive], AirPrint is selected as the printer driver.

The other settings you can specify are as follows:

- [Printer Name]: You can enter the name of your machine using up to 32 characters.
- [Location]: You can enter the location of your machine using up to 64 characters.
- [Latitude], [Longitude], [Altitude]: You can enter the latitude, longitude, and altitude of your machine.

6. Click [OK].

7. Exit the web browser.
Changing the Machine Certificate

A machine certificate required to connect via AirPrint has been installed in advance, but you can change it to other certificates. This section describes the procedure for changing the machine certificate.

You can change the machine certificate by creating a self certificate or importing a certificate that has already been created.

**Note**

- You cannot delete a machine certificate once it has been installed. Installing a new machine certificate overwrites the old certificate.

### Creating a Self Certificate

1. Start your web browser.
2. Enter "http://(the machine's IP address or host name)/" in the address bar.
   
   The top page of Web Image Monitor appears. If the machine’s host name has been registered to the DNS server, you can enter it.
3. Click [Network Settings].

![Web Image Monitor](image)

4. Click the [Certificate] tab.
5. Select [Create New Self-Signed Certificate], and then click [Next].
6. Configure the following settings displayed on the window:
   - [Common Name (Required)]: Enter the name of your machine.
   - [Organization (Optional)], [Organizational Unit (Optional)]: Enter the organization name that your machine belongs to.
   - [City/Locality (Optional)]: Enter the name of the municipality that your machine is used in.
   - [State/Province (Optional)]: Enter the name of the state or province that your machine is used in.
• [Country/Region (Optional)]: Enter the name of the country or region that your machine is used in.
• [Validity Period (days) (Required)]: Enter the period of time when the self certificate can be valid.

7. Click [OK].
8. Exit the web browser.

Importing an Already Created Certificate

1. Start your web browser.
2. Enter "http://(the machine's IP address or host name)/" in the address bar.
   The top page of Web Image Monitor appears. If the machine's host name has been registered to the DNS server, you can enter it.
3. Click [Network Settings].

4. Click the [Certificate] tab.
5. Select [Import Certificate and Private Key], and then click [Next].
6. Specify an already created certificate you want to import.
7. Check the device certificate issued by the certificate authority.
8. To set the password, enter the private key.
9. Click [OK].
10. Wait for about one or two minutes, and then click [OK].
    "Installed" appears under "Certificate Status" to show that a device certificate for the machine has been installed.
11. Exit the web browser.

When you cannot print with AirPrint, contact your service representative.
Trademark

Works with Apple AirPrint

To control this AirPrint-enabled product, the latest iOS and macOS versions are recommended.

iOS is a trademark or registered trademark of Cisco in the U.S. and other countries and is used under license.

AirPrint, the AirPrint logo, Mac, macOS and OS X are trademarks of Apple Inc., registered in the U.S. and other countries.
